

Wash & Cure Plus

Inherit the features of previous generation and explore larger size and more powerful performance.

Technical Specifications

- Machine: Wash and Cure
- Control method: Digital tube, LED indicator, Control knob
- Rated power: 40W
- Input voltage: AC110/240V 50/60Hz
- UV lights: 405nm
- Time selection: 1-60min
- Machine size: 290mm(L)*270mm(W)*479mm(H)
- Basket washing size: 192mm(L)*120mm(W)*290mm(H)
- Hanging cleaning size: 192mm(L)*120mm(W)*235mm(H)
- Curing size: 190mm(D)*245mm(H)
- Weight: ~6.5kg

360° Curing

The 360° arm rotating curing platform, equipped with Lehigh chip light and reflective mirror (120°), enables the machine to realize a real thorough curing.

Upgraded UV Lamp Beads

Added with optical lens, the UV light source can achieve more even irradiation and thorough curing.

More Powerful Washing

Multiple washing methods can bring more flexible model cleaning and avoid contact with resin. Basket washing & hanging cleaning.

Stronger Cleaning Power

The stronger cleaning motor allows the liquid to clean every part of the model, and supports washable resin model cleaning.

Safer To Use

Automatically pause when the cover is removed in the curing mode, the machine will stop curing when the cover is removed to prevent UV light from causing harm to the human body.

Anti-UV light cover

The integrated anti-UV cover is able to block 99.95% 405nm wavelength UV light.

Easier Mode Switching

1.60s time selection provides more choices for washing and curing.

Enclosed Washing Bucket

The washing bucket can accommodate larger size models and is compatible with all LCD resin printers of 8.9inch and below on the market.

After Cleaning & Curing

The water properties of the resin are significantly improved after cleaning and curing.
