

# CREALITY ENDER - 3

Creality 3D Ender 3, the best 3d printer kit with V Slot bearing. Fast printing, super large printing size and large building platform. Easy and Quickly assembly, which really suitable for everyone.

- ❖ Resume Print: Ender 3 has the ability to resume printing even after a power outage or lapse occurs.
- ❖ Easy and Quick Assembly: It comes with several assembled parts, you only need about 2 hours to assemble 20 nuts well.
- ❖ Advanced Technology: Upgraded extruder greatly reduces plugging risk and bad extrusion; V-Slot with POM wheels make it move noiseless, smoothly and durable.
- ❖ Safety protected power supply; only needs 5 minutes for hot bed to reach 110°C

Advantages:

- ❖ Split type design: the electronic control host and the mechanical structure are separated, open your mind, help create a variety of print-outs at will.
- ❖ Shipment of the kit: Solving the problem of large-kit transportation, installation takes only 5 minutes.
- ❖ Industrial grade circuit board: The technology is quite mature and stable, it can work continuously for 200 hours without pressure.
- ❖ Linear pulley system: Patented technology, V-profile+precision pulley, running more smoothly, more wear-resistant. Effectively reduce noise.
- ❖ MK10 Extrusion Mechanism: A brand-new patented infrastructure that effectively reduces the risk of plugging and poor spillage and can print almost all filaments on the market.

# CREALITY ENDER - 3

Technology : FDM

Print Area : 220 x 220 x 250mm

Nozzle : 0.4mm

Filament : PLA, ABS, TPU

Filament Diameter : 1.75mm

Max. Print Speed : 200mm/s

Max. Layer Resolution : 0.1mm

Print Precision : +/-0.1mm

Heated Bed: Yes

Connectivity: SD Card, USB

LCD Screen: Yes
